

## Laboratory equipment:

Translate the names of laboratory equipment:

- |   |   |                                    |
|---|---|------------------------------------|
| 1. adapter  | 49. drum  | 98. Ring support,                  |
| 2. adjustable wrench                              | 50. Erlenmeyer flask                                | 99. pear-shaped flask              |
| 3. Aspirator                                      | 51. Evaporating dishes                              | 100. rotary evaporator             |
| 4. Atomizer and sprayer                           | 52. ferrula   | 101. round flat-bottom flask       |
| 5. Automatic burettes,                            | 53. filtering flask                                 | 102. rubber bulb                   |
| 6. Automatic pipettes                             | 54. flasks and tubes                                | 103. safety label                  |
| 7. balance and scale                              | 55. Flat-bottom flask                               | 104. Scaffolding clamps            |
| 8. beaker tongs                                   | 56. Foot plates for stands                          | 105. Scaffolding                   |
| 9. Beakers  | 57. Forceps and pliers                              | 106. Scoop, scraper                |
| 10. Beakers, with embossed or blue printed scale, | 58. fume hood                                       | 107. separatory funnel             |
| 11. bottle brush                                  | 59. Funnel holders                                  | 108. shaker                        |
| 12. Bottles and buckets                           | 60. Funnel supports                                 | 109. snap-on shear                 |
| 13. Bottletop dispensers                          | 61. funnels and filters                             | 110. spare parts                   |
| 14. Buchner filter flask                          | 62. funnel, short stem                              | 111. spatula, spoon                |
| 15. Buchner funnels                               | 63. gas bubbler                                     | 112. Stands                        |
| 16. Bulb pipettes                                 | 64. Gas washbottle                                  | 113. Stirring rods                 |
| 17. burette                                       | 65. Graduated beakers                               | 114. stirring shaft                |
| 18. Burette clamp                                 | 66. graduated cylinder                              | 115. Stirring spatulas             |
| 19. cap (female/male joint)                       | 67. Grease (silicone paste)                         | 116. Stopcock and stopper          |
| 20. Capillary                                     | 68. heating mantle                                  | 117. Straight-bore stopcocks       |
| 21. carboy and lowboy                             | 69. Holders   | 118. sublimer, sublimator          |
| 22. carboy with faucet                            | 70. immersion filter                                | 119. Support stand                 |
| 23. carboy with spigot                            | 71. jacketed condenser                              | 120. syringe                       |
| 24. Centrifuge tubes                              | 72. Jar with snap-on lid                            | 121. T-bore stopcocks with nozzles |
| 25. Claisen head                                  | 73. Jar with push-on lid                            | 122. template                      |
| 26. Clamps, clamp holder                          | 74. Jar with screw cap,                             | 123. test tubes and vials          |
| 27. clip and hosecock                             | 75. Jaw clamps                                      | 124. thermocouple                  |
| 28. cold traps                                    | 76. laboratory jack                                 | 125. Thermometers                  |
| 29. column  | 77. Ladles  | 126. Thread Adapters               |
| 30. Connectors                                    | 78. sampling dippers                                | 127. Threaded bottles              |
| 31. Cover glasses                                 | 79. Liebig condenser                                | 128. Three-prong clamp             |
| 32. cow receiver                                  | 80. Magnetic stirring bar retriever                 | 129. titrator                      |
| 33. crucible                                      | 81. Magnetic stirring bars                          | 130. foam trap                     |
| 34. Crystallizing dishes                          | 82. manifold  | 131. Tripod base                   |
| 35. Culture tubes                                 | 83. microscope slide                                | 132. Tubes, tubing and tube racks  |
| 36. Cuvettes, UV                                  | 84. mortar and pestle                               | 133. tube rack                     |
| 37. Cylinders                                     | 85. Multichannel pipettes                           | 134. ultrasonicator                |
| 38. Cylinders, graduated                          | 86. multi-neck flask (angled necks, parallel necks) | 135. volumetric flask              |
| 39. Deep well plates                              | 87. oven  | 136. wash bottles                  |
| 40. Desiccator                                    | 88. O-ring and seal                                 | 137. watch glass                   |
| 41. developing tank                               | 89. Pail, pan and tray                              | 138. Water stills and baths        |
| 42. Dewar flask                                   | 90. Pasteur pipettes                                | 139. Water jet filter pump         |
| 43. Dishes  | 91. Petri dish                                      | 140. Weighing dish                 |
| 44. dispenser                                     | 92. pipette filler                                  |                                    |
| 45. distillation apparatus                        | 93. Pipettes, disposable                            |                                    |
| 46. distillation head                             | 94. Powder funnel                                   |                                    |
| 47. drop-dispenser bottle                         | 95. reaction vessel                                 |                                    |
| 48. dropping funnel                               | 96. receiver  |                                    |
|   | 97. reducing adapter                                |                                    |
